OM MIG

This locale currently reuses the English-first positioning strategy while the full Danish translation is being prepared in the CMS.

The important architectural point is that localized content already has a stable model, route, and PDF output.

HVAD JEG LAVER

Shared schema

The same fields and sections exist across locales.

Localized PDFs

The CV download endpoint can generate locale-specific variants.

Localized routes

Pages are served through locale-aware routes from the start.

Application pages

Company-specific pages can also be localized later.

Localized experience placeholder

Ready

Add Danish content in CMS · Denmark

The route and data model exist.

- Structured content source
 - Shared PDF flow
-
